

Work with a partner. The instructions are for two trees, one for each of you!
You will need:

- two toilet-roll tubes
- green and white paper
- a plastic/paper plate
- scissors
- tape
- red or brown paint
- glue
- sweet wrappers

1 Put the paper plate onto the green paper and draw a circle around it. Then, cut the circle out.

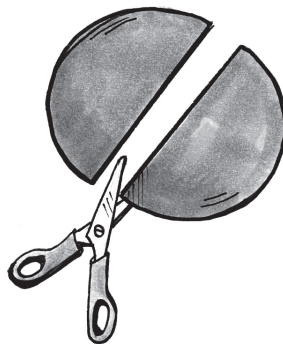

2 Next, cut out a circle of white paper, but make it a bit smaller than the green one.

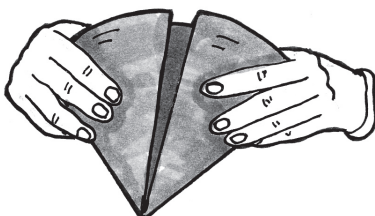

- Then cut out a circle of green paper which is a bit smaller than the white one you have just cut out.
- Repeat until you have six circles which get smaller and smaller: green, white, green, white, green, white.

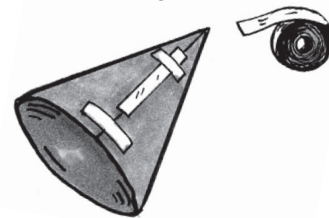

3 Cut each circle in half.

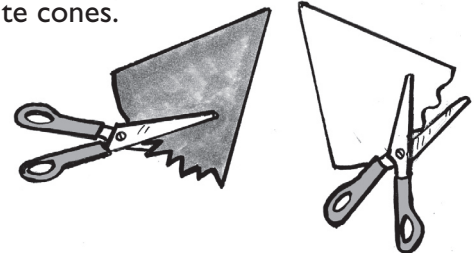

4 Curve each half so that the sides meet, to form a cone.

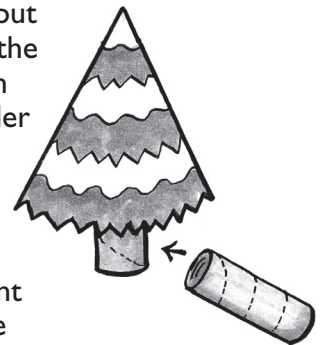

5 Tape the sides together. Do the same for all the halves and you'll have two sets of six cones which get smaller in size.

6 Cut a zigzag pattern along the bottom edge of the green cones and a wavy pattern along the bottom edge of the white cones.

7 For each set of six, put one cone on top of the other, and glue each cone to the one under it. Start with the largest cone at the bottom, and finish with the smallest cone at the top. Paint each toilet-roll tube red or brown, let it dry, and then stick it on the bottom part of the tree to form the tree trunk.

8 Roll some sweet wrappers into tiny balls and then glue them onto the tree.

OUR RESULT!
